Standard Die Clearance

The ideal die clearance is around 5%-10% of the material thickness being punched. If not specified on orders 0.8mm dies will be supplied standard. Dies required for use with Compact 40, 45 & 60 (XM & XA) Machines, weather stated or special, must never have less than 0.4mm clearance.

ALL ABOVE PRICES EXCLUDE G.S.T & FREIGHT

Special Punch & Die Sizes are Available On Request

Discounts apply for orders 4 or more pieces
